## OBJECTIVE

---

to challenge the professional  
development and growth

---

## SKILLS

---

Full-Stack Engineer  
Dev-Ops Engineer  
Test-Driven Development  
Node JS, C#

---

---

## EXPERIENCE

---

### SENIOR SOFTWARE ENGINEER / THOMSON REUTERS (TR)

OCT 2014 – Present

#### Q. 3-4 in 2017 – **Open Source Software Publishing**

My primary achievement was to publish the new version of **TR** application called **Compass Test Automation** to open source world with *Apache License 2.0*.

- Review Code
- Develop README
- Achieve License Standard
- Suggest Further Development

My secondary achievement was to supervise and teach the internship to develop UI with **Angular** and to review their works.

#### Q. 1-2 in 2017 – **Tick History Migration Portal Developing**

The application development was continued with supports. Changes in presentations, reports and processes were introduced. Refactoring became essential.

#### Q. 3-4 in 2016 – **Tick History Migration Portal Kick-Off**

From Success of **FXT Migration Portal**, other business management people demanded to develop a new migration application for their products. The request to develop a new application called "**Tick History Migration Portal**" was found. Due to *short-time-to-develop requirement*, we decided to use **FXT Migration Portal** as foundation to develop from. Because of the strong experience of **FXT Migration Portal**, the new development gained benefits. The first launch could be published within eight weeks.

React, Angular  
Material Design  
MongoDB  
LevelDB  
Mocha  
Microservices  
Event Sourcing  
CQRS

---

#### 2015 - Q. 1-2 in 2016 – **FXT Migration Portal Developing**

My journey in this period was to continue developing features, data input, forms, and reports for FXT Migration Portal. Also application supports was provided.

#### OCT 2014 - FEB 2015 – **FXT Migration Portal First Launch**

My primary achievement was to solely develop the new application from database to UI as Full Stack Development. I picked C#, ASP.NET MVC, jQuery, Bootstrap, and MongoDB.

### **OPERATIONAL MANAGER / TSW**

OCT 2011 – SEP 2014

As promising opportunity, I took a new responsibility as an operational manager. I found that this was valuable experience when I looked back. My responsibilities were following:

- Plan daily tasks
- Distribute and communicate tasks to operations
- Improve cost efficiencies
- Improve productivities
- Create new sales opportunities
- Handle customers issues
- Maintain customers satisfaction

#### Achievements

- Increasing monthly sales around 30%
- Introducing two new products to market
- Reducing packaging costs around 11%

## **TEAM LEAD / ARCHITECODE CORPORATION**

2009 – SEP 2011

From a developer to a team lead, I developed software in software house company. We developed in wide range of products.

- Windows Application
- Web Application
- Web Analytics
- Develop Web using CMS

As Team Lead, I leaded a team of three people. I had experiences various methodologies: from traditional waterfall to casual agile.

- Pair Programing
- Test Driven Development
- Software Architecture

---

## **EDUCATION**

---

### **BACHELOR DEGREE / COMPUTER SCIENCE**

Mahidol University International College

### **HIGH SCHOOL**

Suankularb Wittayalai School

---

## VALUES & SKILLS

---

### VALUES

#### **Integrity**

I truly believe **Integrity** is a foundation of others values. Without it, there are nothings to build on.

#### **Self-Improvement**

I believe anyone can master in anything, but not everything. I need to choose, focus and develop.

#### **Self-Discipline**

I believe only person I can control is myself. Self-Discipline rewards personal productivities.

#### **Commitment**

I believe commitment allows others to have faith in you.

#### **Perseverance**

I believe perseverance is easy for committed person.

### SKILLS

I has developed myself from developer who loves coding to become full-stack engineer and improved quality of coding with tests. To develop quality software, a team becomes essential. **Values, interaction, and communication** are important to team relationship.
